

SETTING UP APPLICATION ENVIRONMENT

Install IBM Cloud CLI:

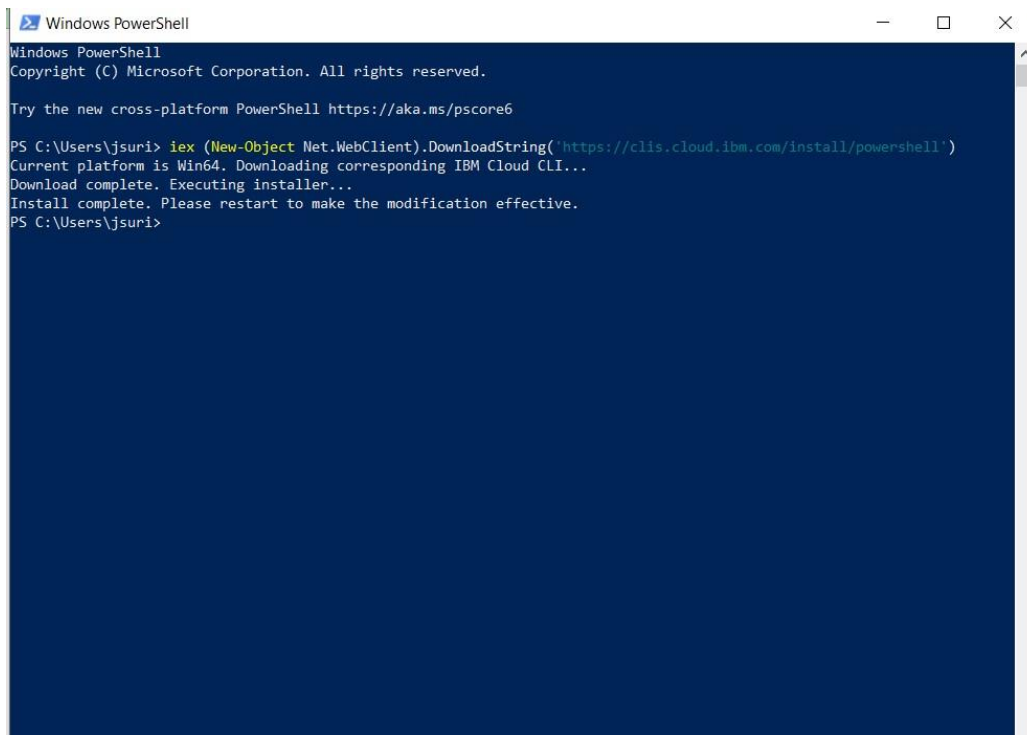

Over here after created account in the IBM cloud there are some tutorials in the dashboard. Over there, get started with CLI tutorial will appear using the documentation we'll install the IBM cloud CLI.

After clicking that tutorial, the instruction documentation page will open using those instructions to install IBM cloud CLI and also install some plugin-tools with the CLI for the work purpose while developing and deploying the Application. Use the following Command to Install the IBM Cloud CLI:

```
iex (New- ObjectNet.WebClient).  
DownloadString('https://clis.cloud.ibm.com/install/powershell')
```

After Installed IBM cloud CLI the PowerShell screenshot shown below:

A screenshot of a Windows PowerShell terminal window. The window has a title bar that says "Windows PowerShell" and standard Windows window controls (minimize, maximize, close). The terminal background is dark blue. The text in the terminal is white. It shows the PowerShell prompt "PS C:\Users\jsuri>" followed by the command "iex (New-Object Net.WebClient).DownloadString('https://clis.cloud.ibm.com/install/powershell')". The output of the command is displayed in several lines: "Current platform is Win64. Downloading corresponding IBM Cloud CLI...", "Download complete. Executing installer...", and "Install complete. Please restart to make the modification effective." The prompt "PS C:\Users\jsuri>" appears again at the end of the output.

```
Windows PowerShell

Try the new cross-platform PowerShell https://aka.ms/pscore6

PS C:\Users\jsuri> iex (New-Object Net.WebClient).DownloadString('https://clis.cloud.ibm.com/install/powershell')
Current platform is Win64. Downloading corresponding IBM Cloud CLI...
Download complete. Executing installer...
Install complete. Please restart to make the modification effective.
PS C:\Users\jsuri>
```
